Distributor Partners,

We have several items we would like to update regarding product transitions within the Rocking Piston Product Line. Please share with your dealers.

Due to the need for product transitions and product line simplification, **2015 will be the last year the AP200X series will be made available.**

The **CAP2-EC Series was designed with the intention of replacing the AP200X.** Many of our Partners have already moved to the new series from this legacy model. The new sleek design has been well received as the CAP2 it is easier to service.

Please assure that your sales teams are well aware of the changes. We are happy to answer any questions you may have.

Regards,

A handwritten signature in blue ink, appearing to read "Wendy Geppert", with a long horizontal flourish extending to the right.

Wendy Geppert  
President
