

Product Data Sheet

Ideal for: reverse osmosis plant managers and operators dealing with controlled-pre-treatment and seeking high-quality permeate water at low operating costs.

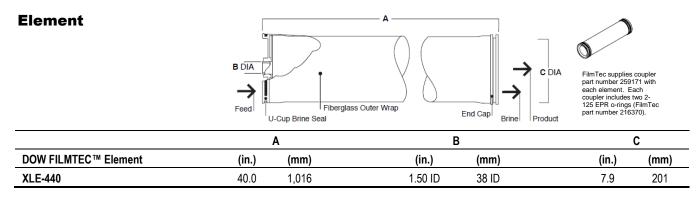

DOW FILMTEC  $^{\rm TM}$  XLE-440, the lowest pressure DOW FILMTEC  $^{\rm TM}$  RO element:

- Provides lower energy costs and more productivity, especially in cold waters
- Minimizes equipment CAPEX in designs with savings in elements and pumping due to the 440 ft<sup>2</sup> active area
- Delivers the most effective cleaning performance, robustness and durability due to its widest cleaning pH range (1-13) tolerance and the support of FilmTec technical representatives

Spiral-wound element with polyamide thin-film composite membrane

	Active Area		Feed Spacer	Typical Permeate Flow Rate Stabilized Salt Minimum Salt		Minimum Salt	
DOW FILMTEC <sup>™</sup> Element	(ft²)	(m²)	Thickness (mil)	(GPD)	(m³/d)	Rejection (%)	Rejection (%)
XLE-440	440	41	28	14,000	53	99.0%	97.0%

- Permeate flow and salt (NaCl) rejection based on the following standard test conditions: 2,000 ppm NaCl, 125 psi (8.6 bar), 77°F (25°C), pH 8, 15% recovery.
- 2. Flow rates for individual elements may vary but will be no more than ±15%.
- Stabilized salt rejection is generally achieved within 24-48 hours of continuous use; depending upon feedwater characteristics and operating conditions.
- 4. Sales specifications may vary as design revisions take place.
- Active area guaranteed ± 5%. Active area as stated by Dow Water & Process Solutions is not comparable to nominal membrane area often stated by some manufacturers. Measurement method described in Form No. 609-00434.

1. Refer to Dow Water & Process Solutions Design Guidelines for multiple-element applications. 1 inch = 25.4 mm

2. Element to fit nominal 8-inch (203-mm) I.D. pressure vessel.

Onerati	na and	Maximum Operating Temperature <sup>a</sup>	112°E (45°C)				
Operating and Cleaning Limits		Maximum Operating Pressure	113°F (45°C) 600 psig (41 bar)				
		Maximum Element Pressure Drop	15 psig (1.0 bar)				
		pH Range, Continuous Operation <sup>a</sup>	2 – 11				
		pH Range, Short-Term Cleaning (30 min.) <sup>b</sup>	1-13				
		Maximum Feed Silt Density Index (SDI)	SDI 5				
		Free Chlorine Tolerance °	< 0.1 ppm				
		<sup>a</sup> Maximum temperature for continuous operation above pH 10 is 95°F (35°C).					
	<sup>b</sup> Refer to Cleaning Guidelines in specification sheet 609-23010.						
		<sup>c</sup> Under certain conditions, the presence of free chlorine and other oxidizing agents will cause premature membrane failure. Since oxidation damage is not covered under warranty, Dow Water & Process Solutions recommends removing residual free chlorine by pretreatment prior to membrane exposure. Please refer to technical bulletin <u>"Dechlorinating Feedwater"</u> for more information.					
Addition Importa		Before use or storage, review these addition	onal resources for important information:				
Informa		<ul> <li>Usage Guidelines for DOW FILMTEC<sup>™</sup> 8" Elements</li> </ul>					
		<u>System Operation: Initial Start-Up</u>					
		* Permeate obtained from first hour of operation should be discarded					
Regulat	ory Note	These membranes may be subject to drinking water application restrictions in some countries; please check the application status before use and sale.					
Product Steward	Dow has a fundamental concern for all who make, distribute, and use its provent of the environment in which we live. This concern is the basis for our product sephilosophy by which we assess the safety, health, and environmental inform products and then take appropriate steps to protect employee and public here environment. The success of our product stewardship program rests with ear individual involved with Dow products—from the initial concept and research manufacture, use, sale, disposal, and recycle of each product.						
Custom	er Notice	Dow strongly encourages its customers to review both their manufacturing processes and their applications of Dow products from the standpoint of human health and environmental quality to ensure that Dow products are not used in ways for which they are not intended or tested. Dow personnel are available to answer your questions and to provide reasonable technical support.
